DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Group I. Claims 1-2 (drawn to an external storage device having plural different commands for read, write, or erase, and dynamically changing plural areas) classified in class 711, subclass 103.
 - Group II. Claims 3-4 (drawn to an external storage device having protected and unprotected areas, where authentication is required to access the protected area) classified in class 711, subclass 163.
 - Group III. Claim 5 (drawn to an external storage device having a part which recognizes the kind of host computer during activation) classified in class 711, subclass 103.

Inventions I, II, and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions:

Invention I, requires dynamically changing plural areas for read, write, or erase operations; and

Invention II, requires an external storage device having protected and unprotected areas which is totally different from dynamically changing plural areas; and

Invention III, requires recognizing the kind of host computer during activation which is totally different from the features required in Inventions I and II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

2. A telephone call was made to Mr. Larry Anagnos (Reg. 32392) on March 20, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 2186

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Aseet Patel whose telephone number is (703) 305-3391. The examiner can normally be reached on Mon - Thurs (7am - 5pm).
